Company - France

Passionate anglers, with more than 100 years of experience in the manufacturing and marketing of fish hooks, we are committed to keeping on innovating to offer you constantly improved fish catching quality products while developing them in a more and more sustainable way. Being socially and environmentally responsible has always been at the heart of the VMC® project. This is self-explanatory when we project the life of our factory over several centuries.

Our planet is beautiful and rich in natural resources including rivers, lakes, seas and oceans. This environment is under pressure from all sides and deteriorating. We fishermen, wardens of our aquatic environments, are aware of this. To meet this challenge, VMC® is committed to limiting its impact on the planet and to support responsible fishermen who preserve our environment.

We work every day to reduce our greenhouse gas emissions. We substitute harmful products with greener alternatives. We are reducing our water consumption and our industrial waste. We have developed eco-responsible packaging. We always want to do better than the standards that are imposed on us as a manufacturer in the European Union. We also collaborate as much as possible with local companies for our various projects.

Our social commitment is just as important. We are proud of the average seniority of our employees, which is almost 15 years, and of having many employees whose families have contributed to the development of our factory for several generations, thus showing their commitment to the industrial adventure of VMC®. This is the strength and expertise of VMC®.

Much remains to be done to reduce our environmental impact and strengthen our social commitment. You have to be humble and move forward step by step. You can count on our determination.

The 2024/2025 season looks promising for VMC®, with ever more technical, innovative products that meet the needs of anglers looking for excellence.

The whole VMC® team wishes you a great season, tight lines and with good times on the water.

Cyrille Viellard

| VMC POINTS |

NEEDLE SHARP™

VMC® Needle Sharp™ is the very latest in premium point technology from VMC®, the result of a unique point-grinding process, chemically sharpened to perfection.

SPARK POINT®

Developed exclusively by VMC® for ultimate performance hooks. A premium point hardened by forming, followed by chemical sharpening ensures permanent hook sharpness. Front and back reinforcement ribs guarantee the point's rigidity. Energy channels increase the speed of penetration and optimise the point's driving force upon striking.

NEEDLE CONE

The result of a sharpening technique that gathers the metal fibers and squeezes them toward the center of the point. By compressing rather than cutting, VMC® has created a point equal or superior in sharpness to the best available and incredibly stronger.

CONE CUT®

The point that combines sharpness, structural stability and quality thanks to a conical tip, a triangular crest and a barb so fine that it assures, without force, a clean and perfect penetration beyond the barb.

CUT POINT

The traditional hook point with excellent penetration capacity. This standard hook point is the most widely manufactured in the world. All VMC® hooks beginning with the number "9" have a standard Cut Point, unless otherwise indicated.

DYNACUT™ POINT

Developed for Big Game Fishing The geometry of the Dynacut point allows the hook to easily penetrate the hardest part of the jaw of Big Game species such as marlin, shark and giant tuna, instantly providing a perfect setting of the hook for a safe and clean fight.

| VMC STEEL |

Carbon stabilizes iron during temperature changes. The higher the level of carbon, the stronger the steel. VMC® uses premium-quality high carbon steel to give a thinner hook the highest quality point and durability.

VMC® Vanadium® hooks owe their success to their lightness allied with their incredible resistance : up to 25 % increased strength. VMC® Vanadium® steel is perfect for any finesse-style hooks that require instant penetration.

Reserved for special professional and premium sport hook series, stainless steel is perfect for deep sea fishing, salmon and big fish. Ultimate corrosion resistance requiring no further coating.

| VMC COATING |

An optimum level of corrosion resistance exists for each individual fishing application. You can depend on VMC® coatings to preserve the unique sharpness, strength, shape and finish of our hooks for as long as you need them to last. The wide range of VMC® coatings offers an efficient solution adapted to every fishing condition.

- BK - BLACK
- BL - BLUE
- BZ - BRONZE
- NT - PTFE

- BN - BLACK NICKEL
- GO - GOLD
- NI - NICKEL
- RD - RED

- CB - COASTAL BLACK
- TI - TIN
- TR - TIN RED
- CT - COASTAL PTFE

- PS - PERMASTEEL®
- 1000+** HOURS !

These coloured hooks receive a thin layer of unique varnish that covers the hook without affecting the sharpness of its point. The varnish creates a shield on Hi-Carbon and Vanadium® steel by covering the entire hook surface. When fishing in freshwater, these VMC® coatings will preserve hook sharpness, strength and appearance to the highest possible level.

Tin and Tin Red coatings are highly recommended for all saltwater fishing applications, particularly those involving intense friction such as trolling or when in direct contact with stainless steel.

The perfect balance between coating thickness and point sharpness, to ensure optimum hook performance and resistance against corrosion.

Smooth P.T.F.E. coating is now available on a number of VMC® premium models. This technical coating improves hook discretion and increases penetration speed by 50 %.

The Coastal PTFE coating (CT) is 5 times more corrosion resistant than a PTFE. It increases the penetration speed by 50% compared with a classic black nickel coating. This exclusive technology is the result of 3 years intensive researches at the VMC factory in France. The new Coastal Black finish, unique to VMC®, is the ultimate combination of an innovative coating for extreme corrosion resistance and a premium hook finishing process for maximum sharpness.

The original anti-corrosion coating by excellence, exclusive to VMC®.

The PermaSteel® secret formula creates a 100% protective shield for even the most vulnerable areas of the hook, whilst maintaining ultimate point sharpness.

VMC® PermaSteel® prevents signs of corrosion in saltwater for over 1000 hours.

END

STRENGTH

1X strong, 2X strong etc. refers to wire thickness.

SHANK

POINT

GAP/BEND

The gap and shape of the hook bend impact the hooking rate and resistance to opening.

PROFILE

FORGING

Forging the hook wire improves the opening resistance.

STEEL

BARB

A close-up photograph of a person's face, wearing sunglasses, with a hand holding a treble fishing hook in the foreground. The hook is sharp and metallic, with three points. The text "TREBLE / DOUBLE" is overlaid in white, bold, sans-serif font across the center of the image.

BABY MUSTACHE SHALLOW

NEW

| The family is growing... a real magnet for big pike! | The «mini» version of our MUSTACHE design is twice as light as the Mustache Shallow without compromising on the amount of bucktail. | Once wet it only weights 22g, so it allows the use of lighter rods. | No need anymore to have an XH rod to swim a Mustache! | This Baby version is perfect for rigging 13 to 18cm lures which makes it extremely versatile.

7312WJ WEEDLESS JIGHEAD

| This hook is designed to be rigged and fished with various types of minnow shaped soft baits with a paddle or straight tail in heavy cover terrain. | The Jig head has been optimised to glide through structures with minimal hang ups be it weeds, rocks or wood laydowns. | In addition, the head design is slightly ovalized to create a slight instability allowing the soft bait to roll from side to side during retrieve. | With these features, we maintained aerodynamics for great distance casting and effortless retrieve though the water. | Hook is forged and made of hi-carbon steel for extra strength and tin coated for great corrosion resistance in saltwater. | Hook gap is wide and optimised for perfect hook-set. Slow rolling or fast darting your soft bait, 7312WJ will do it all with ease.

3254 CROSSLOCK 360°

| The famous CrossLock is now available in a 360° version with rolling. | The perfect Snap to prevent Line Twisting when attached to any Lures: such as wobbling lures, spoons, or lures with strong vibrations (lipless, chatterbait). | The reliability of this snap is highly appreciated by anglers targeting large pike.

3521 TURN LOCK SNAP

| Probably the easiest snap to use. A quarter turn is enough to secure your lure! | Sizes 10 to 4 are perfect for predators like perch, zander, and pike. | The larger sizes (4 and 2) are widely used in sea fishing for bass and bluefin tuna when quick and easy lure changes are necessary. | The integrated rolling feature prevents the leader from twisting.
